About LendX Finance

- Multi-segment lending company
- Offers Personal, Home, Auto, Business & BNPL loans
- Operates across multiple regions
- Generates revenue through interest income & penalty charges

Business Problem Statement

- Rising default rates impacting profitability
- Delayed repayments affecting cash flow
- Risk varies across loan types & customer segments

Objective:
Analyze loan performance, identify high-risk segments, and enable data-driven decision-making to reduce financial risk.

Available Data Overview

Customers: Demographics, income, employment, credit score
Loans: Loan type, amount, interest rate, tenure
Repayments: Payment status, timing, penalties
Defaults: Default events & recovery details
Branches: Geographic distribution

INSIGHTS

The portfolio is loss-making, with ₹386.7M revenue and ₹75.6Cr interest income fully offset by credit losses, resulting in a net loss of ₹204Cr.

Default rate is 9.2% on a ₹7.11bn book with only 76.3% on-time payments; the 23.7% delinquent segment drives most losses.

Average credit score is 512 with a DTI of 2.12, indicating a subprime, over-leveraged customer base borrowing over 2× income.

Revenue per loan is ₹96.67K across 4,000 loans, showing strong unit economics, but portfolio-level losses negate profitability.

BNPL is highly loss-making with 582 loans on ₹31.3M, 20.5% default, and 19.9% interest, indicating unsustainable risk levels.

Personal Loans dominate volume (1,241 loans, ₹336M) but carry 11.2% default, making them the largest contributor to portfolio risk.

Home Loans lead with ₹4.5bn (63%), 798 loans, 4.9% default, and ₹422Cr interest income—largest, safest, and most profitable segment.

Penalty income is ₹7.5M on 991 defaults, indicating weak deterrence; revising late-fee structures could improve collections and income.

Premium segment (52 customers, 5.3%) shows 734 avg score and 7.0% default, making it the safest but underutilized growth segment.

Chennai Anna Nagar leads with 243 loans, ₹2.27Cr revenue, ₹489M book, and 9.4% default—benchmark branch for scale and efficiency.

North region leads with 1,179 loans, ₹2.11bn book, ₹117M revenue, and 9.0% default—highest revenue with controlled risk

East region lags with 807 loans, ₹1.4bn book, ₹7.7Cr revenue, and 9.8% default—weakest risk-return profile

Maharashtra leads with 618 loans, ₹1.03bn book, ₹55.5M revenue (14.4%), and 8.8% default—best-performing state.

Assam records highest risk with 11.4% default on 216 loans and ₹291M book, generating only ₹1.7Cr revenue.
